3. PROFILE OF SKILLS AND COMPETENCES

The most important duties of an Operator C are:

- supervising the operation of installations with which extensive or complicated process operations are carried out;
- monitoring the economic, safe and environmentally-responsible implementation of the entire process;
- undertaking complex process calculations;
- preventing, tracing and ordering the correction of disruptions;
- introducing and supervising new employees;
- planning and coordinating maintenance activities;
- maintaining contacts with other departments.

4. RANGE OF OCCUPATIONS ACCESSIBLE TO THE HOLDER OF THE CERTIFICATE

The professional field process technology encompasses operative and middle management professions in the process industry. In the process industry, products are manufactured according to processes, i.e. step-by-step and often with automatically-operating equipment. Examples of the process industry are the (petro) chemical industry, paper and paper products industry, rubber and plastic processing industry, energy generation companies and pharmaceutical industry.

The Operator C is an operator who on the basis of his extensive knowledge and experience is able to independently and flexibly regulate and monitor complex production processes and operate complex production installations. The Operator C is specifically expert in the field of chemical/physical processes. The Operator C is often in charge of other operators for example as shift head, foreman or chief operator. He is also contact person for managers of other departments within his company. The operator sometimes occupies a specialist task within a team. This means that he is always called in the event of event of particular production problems.

6. OFFICIALLY RECOGNISED WAYS OF ACQUIRING THE CERTIFICATE	
<p>Senior secondary vocational education features two learning pathways: the school-based pathway (bol) and the training on the job pathway (bbl).</p> <p>In the school-based pathway, the majority of the course consists of theory at school. The extent of the practical component (vocational practice) is between 20% and 60%. In the training on the job pathway, the extent of vocational practice is at least 60% of the course. The participant works four days a week in a training company, and attends school for theory subjects just one day a week.</p> <p>In principle it is possible to follow both learning pathways, but which pathway is offered will depend on the individual educational institution.</p>	
Average duration of the education/ training leading to the certificate	4 year(s) (6400 study hours) (depending on previous education)
Entry requirements The certificate preparatory vocational secondary education (vmbo) advanced vocational programme, combined programme, or theoretical programme, or a comparable level.
